SUMMARY

Entry-level front-end developer with a strong foundation in JavaScript and React, passionate about creating responsive and engaging web applications. Dedicated to improving my skills in modern web development technologies and contributing to dynamic projects. Committed to writing clean, efficient code and collaborating with teams to deliver innovative solutions. Eager to start a professional career and grow in the field of front-end development.

SKILLS

Technical skill: **JAVASCRIPT , REACT , CSS , HTML , BOOTSTRAP, GIT**

Other skill: Problem solving, Troubleshooting, Responsive Design

PROJECTS

Anime List https://animelist-project.netlify.app/

- Developed a responsive web application using React to fetch and display anime data based on user input by integrating a third-party API.
- Implemented dynamic search functionality and interactive UI elements to enhance the user experience.
- Designed a mobile-friendly layout, ensuring seamless usability across devices.
- Leveraged React Hooks and focused on clean code, reusability, and performance optimization to
- improve state management and API communication.

SIP Calculator Web Application https://simple-sipcalculator.netlify.app/

- Built a responsive SIP (Systematic Investment Plan) Calculator web application using React, enabling users to calculate potential investment returns.
- Designed an intuitive user interface that dynamically updates results based on parameters like monthly investment, rate of return, and duration.
- Ensured cross-device compatibility with a fully responsive layout for seamless usability across devices.
- Utilized React Hooks for state management and implemented clean, reusable components to enhance maintainability and performance.

EDUCATION

Government Arts and Science College Modakkurichi   2021 - 2024

Bachelor Degree in Commerce (Computer Application)
